

Agriculture Research & Services Intern

Hourly wage: starting at \$16.00

Hours per week: 35-40

Duration: April - September

Location: Falmouth, NS; various field locations throughout the Annapolis Valley and NS

Tasks and Responsibilities:

You will be an essential part of our service and research team. You will be responsible for collecting samples, recording progress and data throughout the season, and delivering products to growers. You will become an effective scout in various crops for pests, diseases, and nutrient concerns. You will also set up, maintain, and monitor field trials we use to evaluate new products and management techniques.

Qualifications: You are pursuing an education in science and/or agriculture.

Job Requirements:

- Valid driver's license
- Strong work ethic
- Willingness to work extended hours, and some weekends
- High regard for quality, accuracy, and attention to detail
- Ability to work alone and with others
- Excellent communicator
- Excellent organizational skills
- Willingness and ability to do physical labor in all weather
- Excellent judgment and discretion in handling confidential and/or sensitive information
- Proficient in computer applications
